SUPERYUPO[®]

Prints like paper, using regular inks, dries hard and fast

SUPERYUPO®

Prints like paper, using regular inks, dries hard and fast

SuperYUPO is the first YUPO material that can be printed on both sides with paper inks. Say goodbye to the hassle of changing inks or reconfiguring the machine for synthetic materials. This outstanding printing medium is quick-drying and tear-resistant, with a silky smooth surface.

SuperYUPO gives you optimum performance time after time. YUPO's versatility and beauty shine through with every project due to its outstanding attributes—a smooth, bright white, 100% waterproof synthetic paper.

YUPO[®] Translucent

Translucent White, Waterproof Synthetic Paper

YUPO® Translucent

Make it shine

YUPO® Translucent is YUPO®'s product range for backlit applications combining water and tear resistance with excellent light diffusion. The YUPO® Translucent range offers the ideal surface for a wide range of applications.

While its paper-like feel and superior colour reproduction enable designers to fully express their creativity, its synthetic nature ensures a durable and long-lasting presence at the point of sale.

A close-up, profile view of a woman's face. She has long, straight hair with a vibrant rainbow gradient, transitioning from red at the roots to yellow, green, and blue at the ends. Her eyes are heavily lined with colorful makeup, featuring shades of red, orange, and blue. She has bright blue contact lenses and is wearing glossy, vibrant red lipstick. The background is a blurred, dynamic pattern of rainbow colors, suggesting motion or a stylized environment.
